MONTHLY DEVELOPMENT UPDATE

JULY 2025

Government of Pakistan
Ministry of Planning, Development & Special Initiatives
Macroeconomic Section

PlanComPakistan

CONTENTS

SUMMARY

Pakistan's macroeconomic performance in FY2025 demonstrated resilience despite global headwinds, with GDP growth rising to 2.7% and inflation dropping sharply to an average of 4.5%, the lowest since FY2016. Strong fiscal consolidation reduced the deficit to 3.7% of GDP, supported by record tax revenues of Rs. 11,740 billion, while the external sector posted a $1.8 billion current account surplus, driven by higher exports and record remittances. On the development front, in June 2025, 33 projects worth Rs. 90.4 billion were approved, and 19 projects totaling Rs. 1,422.8 billion were recommended to ECNEC. Major investments targeted energy (over Rs. 500 billion), transport (Hyderabad–Sukkur Motorway at Rs. 395 billion, Eastbay Expressway at Rs. 301 billion), education (Rs. 43 billion for 17 projects), health (Rs. 25.5 billion), and water (Ghand Dam at Rs. 6.4 billion). These initiatives are expected to generate 9,986 direct and 47,174 indirect jobs. PSDP spending remained strong, with 96% (Rs. 1045 billion) utilization, reflecting improved execution and fiscal discipline, while cost rationalization efforts saved Rs. 891 million in May alone. Monitoring & evaluation systems were reinforced through field monitoring, third-party validations, and a new MoU with SUPARCO for satellite-based oversight. High-level engagements advanced governance and capacity building with the UAE, deepened CPEC cooperation with China, and earned international recognition for higher education reforms in Morocco. Looking ahead, Pakistan aims to sustain this momentum through high-impact, export-led, and inclusive development under the "URAAN Pakistan" framework.

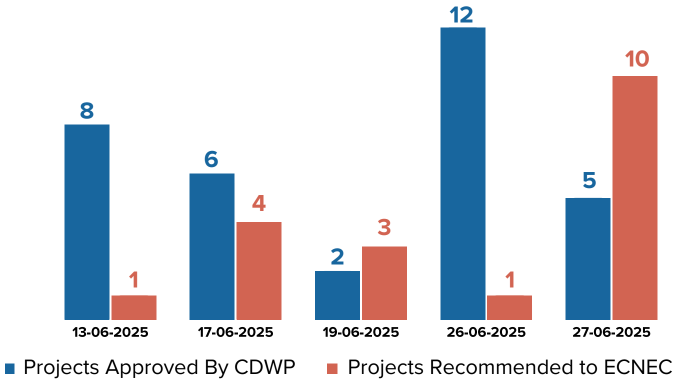
MACROECONOMIC **LANDSCAPE**

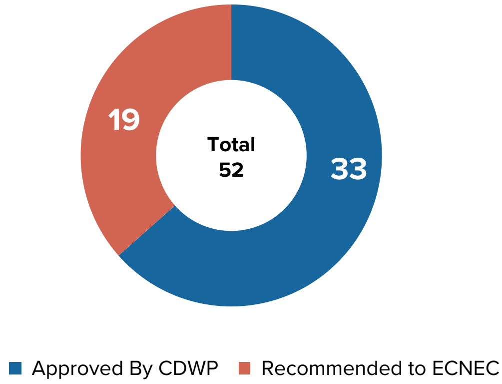
Amid a challenging global environment marked by slower growth, trade restrictions and policy uncertainity, Pakistan's macroeconomic performance continues to demonstrate resilience. While several economies struggled with high double-digit inflation, Pakistan succesfully brought inflation down to an average of 4.5 percent, its lowest since 2016. Additionally, effective fiscal consolidation and external sector stability underscore Pakistan's stronger-than-expected recovery trajectory. This performance reflects prudent economic management and signals growing confidence in Pakistan's ability to navigate external shocks and sustain a path towards stability and inclusive growth.

Pakistan exhibited strong fiscal discipline in FY2025, reducing the deficit to 3.7% of GDP through record tax collection of Rs. 11,740 billion and prudent spending. Externally, the country moved from a $1.6 billion deficit to a $1.8 billion surplus in current account, driven by record remittances ($38.3 billion) and higher exports ($32.1 billion). These improvements strengthened reserves, stabilized the exchange rate, and reinforced market confidence, reflecting effective economic management and resilience amid global challenges. Detailed macroeconomic indicators are at Annex I.

	FY2024	FY2025
GDP GROWTH (%)	2.5	2.7 ↑
INFLATION (%)	23.4	4.5 ↓
REMITTANCES ($ Billion)	30.3	38.3 ↑
	July-May FY2024	**July-May FY2025**
FISCAL DEFICIT (% of GDP)	4.9	3.7 ↓
Current Accout Balance ($ Billion)	-1.6	+1.8 ↑

DEVELOPMENT DYNAMICS





DEVELOPMENT PROJECTS APPROVED IN JUNE 2025

The Central Development Working Party (CDWP), chaired by the Deputy Chairman of the Planning Commission, held five meetings in June 2025 to consider the government's development initiatives. During these meetings, CDWP considered a total of 71 agenda items, comprising 59 projects, 5 position papers, and 7 concept clearance proposals. Out of the 59 projects, 33 projects with a cumulative cost of Rs. 90.4 billion were approved and 19 projects amounting to Rs. 1,422.8 billion were recommended for consideration by the Executive Committee of the National Economic Council (ECNEC). The remaining 7 projects were deferred for further review. The development portfolio spans over projects related to Agriculture & Food, Devolution & Area Development, Education, Energy, Environment, Governance, Health, Higher Education, Information Technology, Physical Planning & Housing, Transport & Communications and Water. Project details are at Annex II, and a brief overview is as follows:

Energy

The energy sector remains the major pillar of Pakistan's economic transformation and industrial expansion agenda. With a cumulative investment of Rs. 549 billion in transmission lines expansion, efficiency improvements, and large-scale renewable initiatives. These investments are crucial to improving national grid reliability, reducing transmission losses, and supporting a transition toward clean and affordable energy solutions.

Transport & Communications

Accelerating infrastructure development is pivotal for boosting national competitiveness and fostering regional integration. Strategic projects such as the Hyderabad–Sukkur Motorway (Rs. 395 billion), Eastbay Expressway at Gwadar (Rs. 301 billion), and key roads in Balochistan and northern regions were recommended to ECNEC. Together, these projects will unlock economic potential, facilitate smoother trade flows, and improve access to remote areas, supporting inclusive growth.

Education

Transforming the higher education landscape is vital for cultivating a knowledge-based economy and empowering future generations. 13 higher education projects were approved, amounting to Rs. 37 billion, including the establishment of new university campuses, provision of modern research facilities, scholarships, and inclusive infrastructure for differently-abled students. This strong focus underscores the government's commitment to fostering innovation, skills development, and equitable educational opportunities nationwide.

Health
Strengthening advanced healthcare facilities is essential for safeguarding public health and addressing the growing burden of non-communicable diseases. A flagship project for the expansion of the National Institute of Heart Diseases in Rawalpindi and the Armed Forces Institute of Cardiology, valued at Rs. 25.5 billion, was recommended to ECNEC. These initiatives will significantly enhance specialized cardiac care capacity and improve access to life-saving services across the country.

Science & Technology
The CDWP approved 3 projects amounting to Rs. 7 billion in a bid to transform Pakistan into a hub for advance sciences, high-tech entrepreneurship and emerging technologies like quantum computing, robotics and AI.

Water Resources
Ensuring sustainable water resources is critical for agricultural growth, rural livelihoods, and long-term national resilience. The approval of the Ghand Dam in Dera Bugti, with a cost of Rs. 6.4 billion, highlights efforts to improve water storage, support irrigation, and mitigate water scarcity, strengthening rural resilience and food security.

Physical Planning & Housing
Key projects, including the new Balochistan Assembly building and the comprehensive water supply scheme in Skardu, collectively worth over Rs. 22 billion, were approved/recommended to ECNEC. These investments aim to bolster regional governance and provide essential services to underserved populations.

Agriculture & Food
Revitalizing agriculture and enhancing food security remain high on the national agenda. Projects such as the Speed Breeding Platform and the Agriculture Research Institute in Punjab, totaling over Rs. 4.8 billion were approved to support climate-resilient agriculture and research. Additionally, the Balochistan Livelihoods and Entrepreneurship Project (Rs. 12.5 billion) was recommended to ECNEC to stimulate rural development and improve community livelihoods.

Environment
An important project for the installation of a weather surveillance radar at Sukkur was approved at Rs. 5.7 billion. The project aims to significantly strengthen Pakistan's capacity to predict extreme weather events and support early warning systems.

Information & Communication Technology
The approval of the digitalization and automation project for the Federal Public Service Commission, valued at Rs. 3 billion, underscores the government's strong commitment to transparency, meritocracy, and modernizing public administration processes.

Governance
A project for capacity building and institutional strengthening of the Ministry of Planning, Development & Special Initiatives (MoPD&SI) was approved at Rs. 2.88 billion, aiming to improve evidence-based planning and enhance the overall effectiveness of national development programs.

Devolution & Area Development
The Hosting Community Support Program for Gilgit-Baltistan and Azad Jammu & Kashmir, approved at Rs. 2.99 billion, highlights the government's commitment to community resilience, social inclusion, and uplift of marginalized areas.

COST RATIONALIZATION, **MAY 2025**

In May 2025, the Ministry conducted a comprehensive review of development projects presented to the CDWP, with a focus on maximizing efficiency and ensuring value for money. Through this scrutiny, unnecessary and non-essential components were identified, and the forum-approved project cost was rationalized from Rs 497 billion to Rs. 496.1 billion. This exercise resulted in immediate savings of Rs. 891 million, underscoring the Ministry's steadfast commitment to prudent fiscal management and the effective utilization of public development resources. Furthermore, the rationalized cost of four projects, representing 44 percent of the total cost of projects recommended to ECNEC, is still pending final approval. This indicates that actual savings are expected to increase even further once these adjustments are finalized.

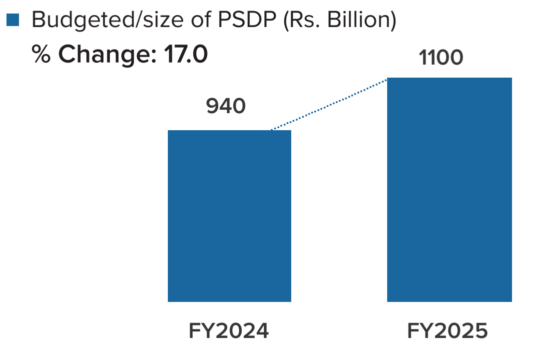
EMPLOYMENT **GENERATION**

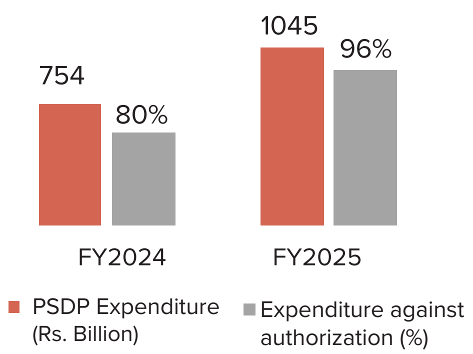
The development portfolio approved during June 2025 underscores the government's commitment to inclusive growth and socio-economic uplift through accelerated job creation. By investing in diverse sectors and strategically designed projects, these initiatives aim not only to stimulate economic activity but also to create substantial employment opportunities nationwide, thereby strengthening livelihoods and contributing to poverty alleviation.

During June 2025, the CDWP approved 33 development projects and recommended 19 projects for consideration by the ECNEC, bringing the total number of projects to 52. As a direct outcome of these initiatives, 5,074 formal posts will immediately be established during project execution period. Furthermore, a comprehensive analysis of PC-I documents submitted by sponsoring agencies indicates a significant employment impact over the coming months, with an estimated 9,986 direct regular job opportunities and approximately 47,174 indirect jobs expected to be created across various sectors.

ALLOCATION AND EXPENDITURE FOR DEVELOPMENT

(1ST JULY- 30TH JUNE FY2025)





PSDP 2024-25

The Federal PSDP 2024-25 was set at Rs. 1,100 billion, focusing on boosting exports, enhancing productivity, expanding IT and digital infrastructure, fostering innovation, developing the agro-industry and seed sector, promoting the blue economy, and advancing science, technology, and R&D reforms. Based on the Finance Division's quarterly release strategy, the Ministry authorized Rs. 1,094 billion (99.5% of the allocation), including Rs. 58 billion in June 2025. According to the SAP system, Ministries and Divisions utilized Rs. 1045 billion, representing 96% of the authorized amount.

SECTORAL OVERVIEW

Infrastructure Sector

The infrastructure sector received an allocation of Rs. 644.43 billion (59%) for FY2025, of which Rs. 281.5 billion was utilized in June 2025, up from Rs. 105.52 billion in May. The transport and communication sector, which received the highest allocation of Rs. 267.98 billion, led expenditure with Rs. 82.2 billion utilized in June, bringing cumulative expenditure to Rs. 225.2 billion. The water sector also performed strongly, disbursing Rs. 67.21 billion in June and reaching a total expenditure of Rs. 147.16 billion. Whereas, the energy and physical planning & housing sectors recorded expenditure of Rs. 99.7 billion and Rs. 32.5 billion, respectively, reflecting steady implementation momentum across key infrastructure priorities.

Social Sector

The social sectors were allocated Rs. 200.48 billion (18% of the total development budget) and demonstrated strong execution performance. The education sector, including allocations for the Higher Education Commission (HEC), expenditure of Rs. 25.4 billion in June. This raised its cumulative expenditure to Rs. 74.0 billion, representing 89% of its total allocation. The health and nutrition sector utilized Rs. 10.2 billion during June. Its cumulative spending reached Rs. 23.8 billion, which is 68% of its Rs. 35.02 billion allocation. This strong financial performance underscores a focused commitment to accelerating human development outcomes.

Governance Sector

The governance sector recorded total expenditure of Rs. 20.4 billion during FY2025, including Rs. 14.5 billion in June. This acceleration underscores active progress in planning, institutional strengthening, and digital governance as part of broader public sector reforms.

Science & Information Technology Sector

The science and IT sector, with an allocation of Rs. 61.67 billion, maintained steady implementation. In June 2025, Rs. 18.0 billion was spent, bringing cumulative expenditure to Rs. 57.8 billion. This reflects sustained prioritization of digital transformation, innovation infrastructure, and applied research initiatives.

Industries & Production Sector

The industrial sector, with an allocation of Rs. 6.70 billion reported utilization of Rs. 662.87 million in June, totaling Rs. 1.11 billion cumulatively. The food and agriculture sector, allocated Rs. 10.81 billion, spent Rs. 4.4 billion by June end. Notably, Rs. 14 billion was reallocated from the Ministry of National Food Security and Research to the Power Division for the solarization of tube wells in Balochistan.

Special Areas and Merged Districts

Special Areas (AJK and Gilgit Baltistan) were allocated Rs. 74.50 billion, with cumulative expenditure reaching Rs. 72.01 billion by end-June, reflecting over 97% utilization. The Merged Districts received Rs. 70 billion, fully released by June 2025. To support the effective implementation of the Accelerated Implementation Program (AIP), a Joint Steering Committee was constituted under the Chief Minister of KP with federal representation.

UTLIZATION
FY2025

Rs 640 Billion
Infrastructure Sector

Rs 179.5 Billion
Social Sector

Rs 20.4 Billion
Governance Sector

Rs 57.8 Billion
Science & IT Sector

Rs 5.5 Billion
Industries & Production Sector

Rs 141.3 Billion
Special Areas and Merged Districts

MAIN FEATURES OF **PSDP 2025-26**

01 The PSDP 2025–26 was approved by the National Economic Council (NEC) on 4 June 2025, with a total allocation of Rs. 1,000 billion, including Rs. 229 billion as rupee cover for foreign-funded projects.

02 Priority in PSDP 2025–26 has been given to mega/core nationally significant projects, foreign-aided schemes, and near-completion projects.

03 The PSDP is aligned with "URAAN Pakistan" (5Es-based National Economic Transformation Plan), focusing on Exports, E-Pakistan, Environment, Energy, and Equity & Empowerment to drive growth and sustainable development.

04 Over 63% of PSDP resources have been allocated to infrastructure, with major shares for transport and communication, water resources, energy, and physical planning & housing.

05 The social sector received 17%, covering health, higher education, SDGs, and related projects.

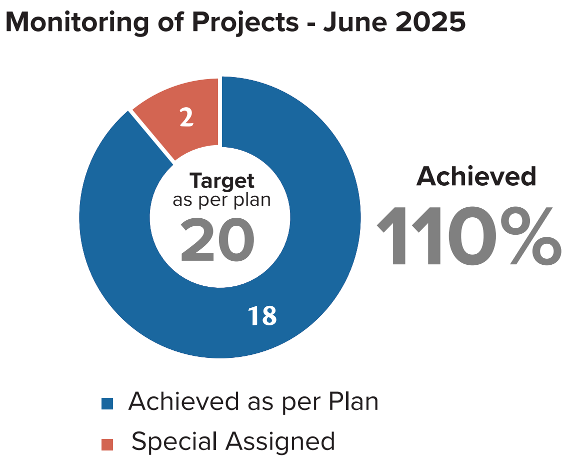
06 Adequate allocations have been earmarked for directed toward science and technology, IT, governance, industries & production, and other sectors.

07 Special emphasis was placed on funding of projects located in Balochistan.

08 Substantial funds are allocated to Azad Jammu & Kashmir, Gilgit-Baltistan, and the Newly Merged Districts of Khyber Pakhtunkhwa to support region-specific Annual Development Programs.

09 Over 98% of resources are earmarked for ongoing projects, including special block provisions, to ensure timely completion under PSDP 2025–26.

MONITORING & EVALUATION OF **PSDP PROJECTS**



The Public Sector Development Programme (PSDP) is the government's key instrument for financing socio-economic uplift, enhancing infrastructure, connectivity, and social development across the country, with a focus on pro-poor growth and regional equity. While significant domestic and donor-funded resources are injected annually, delays due to administrative hurdles and inadequate monitoring often lead to cost and time overruns, burdening the national exchequer and depriving communities of timely benefits. To address this, the government is prioritizing a strengthened Monitoring & Evaluation (M&E) system, aimed at improving project oversight, enhancing service delivery, ensuring better planning, and optimizing resource allocation.

In June 2025, 20 mega projects, including special assignments, were monitored with a focus on critical, slow-moving, and donor-funded schemes. Monitoring has led to reduced time and cost overruns, faster project completion, and improved issue resolution. Effective monitoring resulted in significant savings and included initiatives like third-party validation, regional inclusion, and strengthened support to decision-making forums. Additionally, a dedicated camp office in Quetta ensures focused oversight in Balochistan, reflecting the Ministry's commitment to enhancing M&E capacity for better implementation outcomes. To further strengthen the M&E process, an MoU with SUPARCO has been finalized after extensive consultations with stakeholders. This collaboration will enable the integration of advanced satellite-based monitoring tools, enhancing transparency, real-time oversight, and evidence-based decision-making in project implementation.

In June 2025, the Ministry also evaluated key strategic projects. These included the Development of Integrated Transit Trade Management System (Rs. 31,626 million) to streamline border services; establishment and expansion of data and broadband infrastructure in AJ&K and GB (Rs. 770 million, Rs. 1,898 million, and Rs. 1,780 million respectively) to promote digital inclusion; and the institutional strengthening of the National School of Public Policy (Rs. 861 million) to improve public sector training and research. Collectively, these projects are vital for improving service delivery, regional integration, and national capacity building.

20 MEGA PROJECTS

monitored in June alone,
cutting delays and costs

PSDP ramps up with smarter oversight and satellite tracking to drive pro-poor growth and regional equity.

FROM ISOLATION TO INNOVATION: HOW BROADBAND IS RESHAPING AJ&K AND GB

The successful completion of Rs 2,150 million broadband expansion project has connected 30 cities and towns across Azad Jammu & Kashmir and Gilgit-Baltistan, delivering transformative benefits to the region. Students now access world-class educational resources, helping bridge the gap between remote villages and urban centers. Doctors in small towns can consult with specialists in major hospitals through video calls, bringing better healthcare to doorsteps. Local shop owners and craftsmen are reaching customers across Pakistan through online markets, boosting family incomes. The tourism industry, vital to the region's economy, is flourishing as visitors can now easily research and book trips online.

The project has also created valuable job opportunities, from technical roles maintaining the network to new positions in digital services. Families are able to stay better connected with loved ones working abroad, while young people gain access to online skills training and job platforms. Perhaps most importantly, this connectivity is helping integrate these beautiful mountainous regions more fully into Pakistan's growing digital economy, ensuring their residents can participate equally in the nation's progress. As the network continues to expand, it promises to unlock even more opportunities for education, healthcare, and economic growth in the years to come.

—Connecting Communities, Powering Progress.

MAJOR ENGAGEMENTS WITH **DEVELOPMENT PARTNERS**

MOU with the UAE on Governance and Building Institutional Capability

An MoU on governance and institutional capacity building was signed between Pakistan and the UAE on 16 June 2025, witnessed by the Prime Minister. The agreement aims to strengthen governance, enhance institutional capabilities, and build future-ready skills. Cooperation will focus on knowledge exchange, public sector reforms, development planning, human resource development, urban development, and science & technology, advancing Pakistan's modernization and development agenda.

Pakistan China Deepen CPEC and Media Cooperation

On 19 June 2025, the Minister for Planning hosted a senior Chinese delegation in Islamabad, led by Mr. Hu Zhaoming, Director General International Department of Communist Party China, to advance cooperation under the second phase of the China-Pakistan Economic Corridor (CPEC). The meeting focused on preparations for the upcoming 14th Joint Coordination Committee meeting in July and explored new opportunities for collaboration in media, arts, and culture, reinforcing strategic ties and fostering broader socio-economic development.

Pakistan Recognized by Islamic World for its Knowledge-based Economy Efforts

At the 6th Vice Chancellors' Forum of Universities in the Islamic World, held in Rabat on 23 June 2025, Pakistan's efforts to reimagine higher education were showcased during the Ministerial Plenary on "Reimagining Higher Education in Islamic Countries." In recognition of these initiatives, Pakistan was honored with a prestigious Lifetime Achievement Award for its commitment to building a knowledge-based economy through strategic investments in higher education, science, and innovation. The forum also acknowledged Pakistan's leadership in promoting a shared vision of ethical inquiry, collaboration, and technological advancement across the Islamic world.

DEVELOPMENT **OUTLOOK**

Pakistan's macroeconomic stability, supported by improved fiscal and external sector indicators, lays a strong foundation for an accelerated development trajectory. The government's strategic focus on high-impact, inclusive, and export-led projects under the PSDP aligns with "URAAN Pakistan" priorities, emphasizing exports, digitalization, green growth, energy security, and social equity. With targeted investments in energy, infrastructure, education, and regional uplift, the development program aims to enhance productivity, create quality jobs, and strengthen human capital.

Robust monitoring and evaluation reforms are addressing chronic implementation gaps, reducing time and cost overruns, and promoting evidence-based adjustments. Enhanced cooperation with development partners and integration of advanced technologies are expected to further improve delivery. Moving forward, leveraging limited resources to maximize development impact will be a core priority of the government to achieve sustained, equitable growth and transformed Pakistan into a dynamic, resilient, and forward-looking economy.

> **"Building a dynamic, resilient Pakistan through targeted investments, robust reforms, and a bold push for exports, digitalization, and green growth."**
